It may be impossible for us to keep a constant watch and urge DX stations not to work anyone signing in with this callsign. More information about this operation can be looked up at QRZ.COM under the call sign DX1ABC. I thought it would be nice to warn the Dx community and discourage all pirate operations on the amateur radio bands. It is really terrible in this part of the world."

He also states he stopped operating on 160m from T8 during 1997, but now he wants to restart it again. His current and tentative plan is to leave for Damascus on Friday, April 11th, and arrive there on Sunday, April 13th. Saad plans to have the same simple setup as last year, bare foot into a short G5RV. This setup worked surprisingly well last year, so he hopes to get similar results this time also. Saad expects to be active from **April 15-27th**, give or take a day or two, and possibly extend his stay for a few more days up to one week. His callsign will be **YK1BA**. QSL via N5FF, direct or Bureau is OK. The purpose of the trip is not ham radio, so his operating will be very spotty and not extensive at all. Like last year, Saad hopes to be able to operate at least 3-4 hours a day. He thinks he will limit his operating to 20 meters, unless the propagation is better on the other bands (40-10 meters) at the time. Saad will work the Americas and Pacific early mornings local time, that's between 0100-0400z. Europe and Africa will be in the late evenings, that's between 1900-2200z, and possibly some afternoons, that's 1100-1400z. Saad will try to be around 14195 kHz on SSB, and 14045 kHz on CW, split listening 5-10 kHz up.

YS & HU1, EL SALVADOR. Operators Holger/DL7IO, Birgit/DL7IQ and Cisco/YS1CF will be active from various mountains, lakes, beaches, and ruins of El Salvador between **March 24th and April 15th**. that 100% of each donation went directly to the Fund. Judy also states the following, "Please express the gratitude of INDEXA, ZL1AMO, and the Wright family to your subscribers. As always, in a time of great need, they and so many others in the DX/amateur radio community rose to the occasion in order to provide humanitarian assistance to a colleague in need. The camaraderie and fellowship that goes beyond the nuts and bolts of the hobby is what makes amateur radio truly unique!"
